Anchoring Tension Clamp for FTTH Drop Cable

Product Drawing

Product Description

Anchoring Tension Clamp for FTTH Drop Cable is an anchoring tension clamp designed specifically for fiber to home (FTTH) drop cables. There are multiple styles to choose from, meeting the needs of different types of optical cables and installation environments. Its unique structural design can effectively fix and disperse the tension of optical cables, ensuring the safety and stability of FTTH drop cables.

Product features

- The unique clamping structure can evenly distribute the tension of the optical cable, reducing its wear and damage.
- Has good weather resistance and can maintain stable performance under various climatic conditions.
- Adopting a fast installation design without the need for special tools, it can greatly save installation time and cost.

Application

Applied in FTTH construction.

Technical Specifications

Product Parameters

Project	Technical indicators
Product name	Anchoring Tension Clamp for FTTH Drop Cable
Application	For FTTH Aerial fiber optic cable fixing
Cable Range	4-8mm
Color	Silver Black
Material	Plastic + Stainless steel
Usage	Drop Wire Clamp
Type	Hardware Tool
