

## Fiber Cable Hook Clamps

### Product Drawing

### Product Description

Fiber Cable Hook Clamps is a support device specifically designed for optical cables. The product is made of high-strength alloy materials, ensuring excellent durability and stability. The unique design can evenly distribute the tension of the optical cable, effectively preventing it from being damaged due to uneven force, and the variety of styles meets the diverse installation needs.

### Product features

- Has excellent corrosion and oxidation resistance, suitable for various harsh environments.
- Has good insulation performance to ensure safe use.
- The product installation is simple, greatly reducing installation costs and time, and improving work efficiency.

### Application

Applied to Fiber Optic Cable installation.

### Technical Specifications

#### Product Parameters

Project	Technical indicators
Product name	Fiber Cable Hook Clamps
Material	Galvanized steel
Weight	0.15kg
Function	Drop cable and adss cable fixing
Color	Silver
Surface treatment	Galvanized Surface
Type	Metal Steel Bracket
Temperature Range	-50℃~+70℃
