# Tangent Support for ADSS Drop Cables

## Product Drawing

## Product Description

Tangent Support for ADSS Drop Cables is a Tangent Support designed specifically for All Dielectric Self Supporting ADSS optical cables. Made of high-strength aluminum alloy material, ensuring stable support for ADSS optical cables under various weather and load conditions.

## Product features

- It has excellent corrosion resistance and can maintain its performance for a long time even in harsh environments.
- Compact design, simple and clear installation steps, reducing installation costs and time.
- Supporting multi angle installation, the cable suspension angle can be adjusted according to actual needs to meet the application needs in different scenarios.

## Application

Applied in ADSS Cable construction.

## Technical Specifications

### Product Parameters

| Project | Technical indicators |
|---|---|
| Product name | Tangent Support for ADSS Drop Cables |
| Processing technology | Die casting+assembly |
| Material quality | Aluminum/Carbon Steel |
| Overall weight | 766g |
| Size | Total length 120mm |
| Using wire diameter | 9-11MM |
| Surface Treatment | Sanding treatment |
| Bearing capacity | 4KN |
| Application | Overhead Line Accessories |
| Packaging requirements | 30 pieces/box |
